## About ICCMA

Indian Corrugated Case Manufacturers Association – ICCMA was established in 2009 to bring together all progressive box makers in India, on a single platform, to discuss, interact and chalk out plans for the growth of the industry. It has been established to address the issues faced by the corrugated box units having automatic corrugating production lines. Its mission is to provide its members those services and facilities which would promote the optimal packaging solutions to the consumers.

ICCMA aspires to act as a catalyst for the growth of the corrugated packaging industry by interacting closely with the Government of India and the other state governments for the formulation of policies, conducting various seminars and workshops, organizing buyer- seller meets, participating in national and international conferences, organizing exhibitions and engaging in continuous improvements through R&D.

The Pan India membership strength of ICCMA is currently over 200+ and market share of all these automatic units is approximately 40% of total production of corrugated packaging in the country, with the latest state of the art technology.
